### **ONYX Graphics Launches ONYX Workflow Software X10**

---

ONYX X10 Océ Edition has been officially released and will be shipped with all new Océ ONYX purchases. ONYX software version 7.3.2 is no longer available.

#### **X10 New Features**

See ONYX Graphics website: [www.onyxgfx.com](http://www.onyxgfx.com)

#### **Upgrading 7.3.2 to X10**

- Océ ONYX ProductionHouse and ONYX PosterShop software users can subscribe now to ONYX Advantage Software Maintenance and get an immediate upgrade from version 7.X to X10.
- A dongle/key update file provided with an ONYX Advantage Software Maintenance agreement is required to update a current 7.3.2 key to also run X10.
- Upgrading a 7.3.2 system will install X10 in a different folder so either version can be used.

#### **Computer System Requirements**

Refer to the ONYX website and click on the Products tab.

#### **Installation**

##### **Prerequisites**

1. X10 enabled dongle/key – new software purchase or updated via ONYX Advantage Software Maintenance purchase.
2. X10 Software – DVD included with new software purchase or can be downloaded from ONYX website.

##### **Installation Procedure**

1. Launch X10 installer and install. If version 7.3.2 is installed, 7.3.2 settings and media will be imported into X10. However please follow next step to update any installed printer drivers.
2. Update installed printer driver(s) by downloading and installing the current version(s) using the ONYX Driver and Profile Download Manager.

NOTE: It is very important to use a current printer driver. Download it from the ONYX website.
